

**Dohee Hahn**

SMR Platform Coordinator  
IAEA

Dr. Hahn is currently serving as SMR Platform Coordinator at the International Atomic Energy Agency. He previously assumed the position of Director of the Division of Nuclear Power at the IAEA.

He has over 30 years of experience in the nuclear field. Before joining the IAEA in 2015, he was Vice President for Advanced Nuclear Energy Systems at the Korea Atomic Energy Research Institute. In this position, he led national research and development programs in the areas of fast reactors, very high temperature reactors and related fuel cycles. He also participated in high-level strategic planning and management of the institute.

Having served on numerous national and international committees on advanced nuclear systems, he has also been the Technical Director for the Generation IV International Forum.
